## 2015-2016:

- **S. Abdulali,** Hodge structures associated to *SU(p,1)*. *Communications in Algebra* **43** (10) (2015) 4209-4220.
- **S. Abdulali,** Tate twists of Hodge structures arising from abelian varieties. In Matt Kerr; Gregory Pearlstein (Ed.) *Recent Advances in Hodge Theory: Period Domains, Algebraic Cycles and Arithmetic*, Cambridge University Press [A] (2016) 292-307.
- W. Just and **S. Ahn** Lengths of attractors and transients in neuronal networks with random connectivities. *SIAM J Discrete Math* (2016) **30(2):** 912-933.
- S. Ratnadurai-Giridharan, S. E. Zauber, R.M. Worth, T. Witt, **S. Ahn**, Leonid L. Rubchinsky: Temporal patterning of neural synchrony in the basal ganglia in Parkinson's disease. *Clinical Neurophysiology* (2016) **127(2):**1743-5.
- **Ali A. Al-Sharadqah** and Dominic K.C. Ho, Solutions and evaluations for fitting of concentric circles. *Signal Processing* **120** (2016) 468–479.
- **G. Fucci** and K. Kirsten, Expansion of Infinite Series Containing Modified Bessel Functions of the Second Kind. *Journal of Physics A: Mathematical and Theoretical* 48 (2015) 435203.
- **G. Fucci**, The Casimir Effect for Thick Pistons. *International Journal of Modern Physics A* **31** (2016) 1650012.
- Haranas, O. Ragos, **I. Gkigkitzis** and Ilias Kotsireas, Quantum and post-Newtonian effects in the anomalistic period and the mean motion of celestial bodies. *Astrophysics and Space Science*. (2015) 358:12.
- M.J. Dorfling, **J.H. Hattingh,** and E. Jonck, Total domination in maximal outerplanar graphs II. *Discrete Mathematics* 339 (2016) 1180-1188.
- **E. Katsoulis**, Local maps and the representation theory of operator algebras. *American Mathematical Society Transactions* **368** (2016) 5377-5397.
- **W. T. Obuchowska.** Irreducible infeasible sets in convex mixed-integer programs. *Journal of Optimization Theory and Applications,* **166** (3) (2015), 747-766.
- **Patyi,** On some elementary functions. *The Mathematical Gazette* **99 (**545) (2015) 263–275
- **Patyi**, On holomorphic domination. II. *Comptes Rendus Mathematique* 353 (2015) 501–503.
- F. Brown, **D.W. Pravica** and M. Bier, Self-similarity and non-Markovian behavior in traded stock volumes. *European Physical Journal B* **88** (2015) (11) 1-9.
