

2017-18

Articles

Park, C., Clements, K. N., Issa, F. A., & Ahn, S. (2018). Neural mechanisms underlying social status-dependent habituation of the Mauthner escape circuit in zebrafish (*Danio rerio*): Empirical and computational analysis. *Frontiers in Neural Circuits*, 12, 1–16.

Ahn, S., Zauber, S. E., Worth, R. M., Witt, T., & Rubchinsky, L. L. (2018). Neural synchronization: average strength vs. temporal patterning. *Clinical Neurophysiology*, 129(4), 842–844.

Ahn, S., & Rubchinsky, L. L. (2017). Potential Mechanisms and Functions of Intermittent Neural Synchronization. *Front Comput Neurosci*, (11), 44.

Song, B., & Choi, J. (2018). Theorems in Visual Arts: Art and Math Collaboration toward Creative Leadership. *Advisory: National Art Education Association*.

Fucci, G., & Kirsten, K. (2018). Some new results for the one-loop mass correction to the compactified $\lambda\phi^4$ theory. *Journal of Mathematical Physics*, 59, 033503

Fucci, G. (2017). The Casimir effect for pistons with transmittal boundary conditions. *International Journal of Modern Physics A*, 32(31), 1750182.

Dorfling, M., Hattingh, J. H., & Jonck, E. (2017). Total domination in maximal outer-planar graphs I. *Discrete Applied Mathematics*, 217, 506–511.

Harris, L. M., Hattingh, J. H., & Henning, M. A. (2018). Further results on total k -subdominating function in trees. *Journal of Combinatorial Mathematics and Combinatorial Computing*, 104, 65–73.

Hattingh, J. H., & Joubert, E. J. (2018). The product of the total restrained domination numbers of a graph and its complement. *Australasian Journal of Combinatorics*, 70, 297–308.

Pravica, D. W., Randriampiry, N., & Spurr, M. J. (2018). On q -Advanced Spherical Bessel Functions of the First Kind and perturbations of the Haar wavelet. *Applied and Computational Harmonic Analysis*, 44(2), 350–413.

Prematilake, C., & Ellingson, L. (2017). Evaluation and prediction of polygon approximations of planar contours for shape analysis. *Journal of Applied Statistics*, 1–20.

Shlapentokh, A., & Jarden, M. (2017). Decidable algebraic fields. *Journal of Symbolic Logic*, 82(2), 474–488.

Book

Bercovici, H., Katsoulis, E., Kerr, D., & Timotin, D. (2017). *Recent Advances in Operator Theory and Operator Algebras*. Chapman and Hall/CRC, Taylor and Francis Group.

Chapter

Shlapentokh, A. (2017). Extensions of Hilbert's Tenth Problem: Definability and Decidability in Number Theory. In Martin Davis on Computability, Computational Logic, and Mathematical Foundations. Springer US.
